PROCEEDINGS

OF THE

ROYAL SOCIETY OF LONDON

SERIES A

CONTAINING PAPERS OF A MATHEMATICAL AND PHYSICAL CHARACTER.

VOL. LXXXII.

LONDON:

PRINTED FOR THE ROYAL SOCIETY AND SOLD BY
HARRISON AND SONS, ST. MARTIN'S LANE,
PRINTERS IN ORDINARY TO HIS MAJESTY.

SEPTEMBER, 1909.

CONTENTS.

SERIES A. VOL. LXXXII.

No. A 551.—February 16, 1909.

PAGE

Address of the President, Lord Rayleigh, O.M., D.C.L., at the Anniversary Meeting on November 30, 1908 1

The Charges on Ions produced by Radium. By C. E. Haselfoot, M.A., Hertford College, Oxford. Communicated by Prof. J. S. Townsend, F.R.S. 18

A Comparison of the Radium Emanation Spectra obtained by different Observers. By T. Royds, M.Sc., 1851 Exhibition Scholar. Communicated by Prof. E. Rutherford, F.R.S. 22

The Extension of Cracks in an Isotropic Material. By A. Mallock, F.R.S. 26

The Rotation of the Electric Arc in a Radial Magnetic Field. By J. Nicol, B.A., B.Sc., Wheatstone Laboratory, King's College, London. Communicated by Prof. H. A. Wilson, F.R.S. 29

The Isothermal Layer of the Atmosphere and Atmospheric Radiation. By E. Gold, M.A., Fellow of St. John's College, Cambridge, and Reader in Meteorology. Communicated by Dr. W. N. Shaw, F.R.S. 43

Note on the Effect of Hydrogen on the Discharge of Negative Electricity from Hot Platinum. By Prof. H. A. Wilson, F.R.S., King's College, London 71

The Yielding of the Earth to Disturbing Forces. By A. E. H. Love, F.R.S., Sedleian Professor of Natural Philosophy in the University of Oxford 73

The Relation of the Earth's Free Precessional Nutation to its Resistance against Tidal Deformation. By Prof. J. Larmor, Sec. R.S. 89

No. A 552.—March 10, 1909.

Notes on Observations of Sun and Stars in some British Stone Circles. Fourth Note.—The Botallek Circles, St. Just, Cornwall. By Sir Norman Lockyer, Sc.D., K.C.B., F.R.S., Director Solar Physics Observatory 96

On the Passage of Röntgen Rays through Gases and Vapours. By J. A. Crowther, B.A., Fellow of St. John's College, Cambridge, Mackinnon Student of the Royal Society. Communicated by Prof. Sir J. J. Thomson, F.R.S. 103

On the Velocity of the Cathode Rays ejected by Substances exposed to the γ-Rays of Radium. By R. D. Kleeman, B.A., B.Sc., 1851 Exhibition Scholar of the University of Adelaide, and Research Student of Emmanuel College; Emmanuel College, Cambridge. Communicated by Prof. Sir J. J. Thomson, F.R.S. 128

PAGE

Determination of the Surface-tension of Water by the Method of Jet-vibration. By Prof. N. Bohr (Copenhagen). Communicated by Sir W. Ramsay, K.C.B., F.R.S. (Abstract) 146

Obituary Notices of Fellows deceased :—

John Kerr ; Dr. James Bell, C.B. ; R. L. J. Ellery ; Spencer Compton Cavendish, Duke of Devonshire ; Colonel Andrew Wilson Baird ; William Ashwell Shenstone.

(At end of volume.)

No. A 553.—May 6, 1909.

The Specific Heats of Air and Carbon Dioxide at Atmospheric Pressure, by the Continuous Electrical Method, at 20° C. and at 100° C. By W. F. G. Swann, A.R.C.S., B.Sc. Communicated by Prof. H. L. Callendar, F.R.S. (Abstract)... 147

On the Depression of the Filament of Maximum Velocity in a Stream flowing through an Open Channel. By A. H. Gibson, M.Sc. (Vict.). Communicated by Prof. J. E. Petavel, F.R.S. 149

The Photo-electric Fatigue of Zinc.—II. By H. Stanley Allen, M.A., B.Sc., Senior Lecturer in Physics at King's College, London. Communicated by Prof. H. A. Wilson, F.R.S. 160

The Mobilities of the Ions produced by Röntgen Rays in Gases and Vapours. By E. M. Wellisch, M.A. (Sydney), Emmanuel College, Cambridge ; Barker Graduate Scholar of the University of Sydney. Communicated by Prof. Sir J. J. Thomson, F.R.S. (Abstract)..... 165

The Leakage of Helium from Radio-active Minerals. By the Hon. R. J. Strutt, F.R.S., Professor of Physics, Imperial College of Science, South Kensington ... 166

On the Electricity of Rain and its Origin in Thunderstorms. By George C. Simpson, D.Sc. Communicated by Dr. Gilbert T. Walker, F.R.S. (Abstract) 169

The Tension of Metallic Films deposited by Electrolysis. By G. Gerald Stoney. Communicated by the Hon. C. A. Parsons, C.B., V.-P.R.S. 172

A Further Note on the Conversion of Diamond into Coke in High Vacuum by Cathode Rays. By Alan A. Campbell Swinton. Communicated by the Hon. C. A. Parsons, C.B., V.-P.R.S. 176

The Statistical Form of the Curve of Oscillation for the Radiation emitted by a Black Body. By Prof. Harold A. Wilson, F.R.S., King's College, London 177

Best Conditions for Photographic Enlargement of Small Solid Objects. By A. Mallock, F.R.S. 181

On the Spontaneous Crystallisation of Monochloracetic Acid and its Mixtures with Naphthalene. By H. A. Miers, F.R.S., and Miss F. Isaac. (Abstract) 184

Note on the Stability of Jacobi's Ellipsoid. By Sir G. H. Darwin, K.C.B., F.R.S. ... 188

PAGE

On the Wave-lengths of Lines in the Secondary Spectrum of Hydrogen. By Herbert Edmeston Watson, B.Sc. (Lond.). Communicated by Sir William Ramsay, K.C.B., F.R.S. 189

The Expulsion of Radio-active Matter in the Radium Transformations. By Sidney Russ, B.Sc., Demonstrator in Physics, and Walter Makower, B.A., B.Sc., Assistant Lecturer and Demonstrator in Physics in the University of Manchester. Communicated by Prof. E. Rutherford, F.R.S. 205

An Attempt to detect some Electro-optical Effects. By Prof. Harold A. Wilson, F.R.S., King's College, London 224

No. A 554.—May 26, 1909.

Syntonic Wireless Telegraphy; with Specimens of Large-scale Measurements. By Sir Oliver Lodge, F.R.S., and Dr. Alex. Muirhead, F.R.S. 227

On the Influence of their State in Solution on the Absorption Spectra of Dissolved Dyes. By S. E. Sheppard, D.Sc. (Lond.), late 1851 Exhibition Scholar. Communicated by Sir William Ramsay, K.C.B., F.R.S. 256

"Dynamic" Osmotic Pressures. By the Earl of Berkeley, F.R.S., and E. G. J. Hartley, B.A. (Oxon) 271

The Wave-making Resistance of Ships: a Theoretical and Practical Analysis. By T. H. Havelock, M.A., D.Sc., Fellow of St. John's College, Cambridge, Lecturer in Applied Mathematics, Armstrong College, Newcastle-on-Tyne. Communicated by Prof. J. Larmor, Sec. R.S. 276

Liberation of Helium from Radio-active Minerals by Grinding. By J. A. Gray, B.Sc. (Melbourne). Communicated by the Hon. R. J. Strutt, F.R.S. 301

No. A 555.—June 30, 1909.

An Apparatus for Measurements of the Defining Power of Objectives. By J. de Graaff Hunter, M.A., late Assistant at the National Physical Laboratory. Communicated by R. T. Glazebrook, F.R.S. 307

The Flight of a Rifled Projectile in Air. By Prof. J. B. Henderson, D.Sc., Royal Naval College, Greenwich. Communicated by W. Burnside, F.R.S. 314

On the Graphical Determination of Fresnel's Integrals. By John H. Shaxby, B.Sc. (Lond.), University College of South Wales and Monmouthshire. Communicated by Principal E. H. Griffiths, F.R.S. 331

A Phenomenon connected with the Discharge of Electricity from Pointed Conductors. By H. T. Barnes, Macdonald Professor of Physics, and A. N. Shaw, Demonstrator of Physics, McGill University, Montreal; with a Note by John Zeleny, Professor of Physics, University of Minnesota. Communicated by Prof. E. Rutherford, F.R.S. 336

On the Effect of Temperature on Ionisation. By J. A. Crowther, M.A., Mackinnon Student of the Royal Society, Fellow of St. John's College, Cambridge. Communicated by Prof. Sir J. J. Thomson, F.R.S. 351

PAGE

The Ionisation in Various Gases by Secondary γ-Rays. By R. D. Kleeman, D.Sc. (Adelaide), B.A. (Cantab.), Research Student of Emmanuel College, Cambridge. Communicated by Prof. Sir J. J. Thomson, F.R.S. 358

Note on a Curious Property of Neon. By J. Norman Collie, F.R.S. 378

Note on the Results of Cooling certain Hydrated Platin-Cyanides in Liquid Air. By J. Emerson Reynolds, M.D., Sc.D., F.R.S. 380

Some Results in the Theory of Elimination. By A. L. Dixon, M.A., Fellow of Merton College, Oxford. Communicated by Prof. Love, F.R.S. 384

No. A 556.—July 26, 1909.

Utilisation of Energy stored in Springs for the Production of Mechanical Work. By A. Mallock, F.R.S. 387

The Absolute Value of the Mechanical Equivalent of Heat, in terms of the International Electrical Units. By Howard T. Barnes, D.Sc., Macdonald Professor of Physics, McGill University, Montreal. Communicated by Prof. H. L. Callendar, M.A., LL.D., F.R.S. 390

An Approximate Determination of the Boiling Points of Metals. By H. C. Greenwood, M.Sc., Beyer Fellow of the University of Manchester. Communicated by Prof. E. Rutherford, F.R.S. 396

On Electrostatic Induction through Solid Insulators. By Prof. Harold A. Wilson, F.R.S., King's College, London 409

The Measurement of Dielectric Constants by the Oscillations of Ellipsoids and Cylinders in a Field of Force. By W. M. Thornton, D.Sc., D. Eng., Professor of Electrical Engineering in Armstrong College, Newcastle-upon-Tyne. Communicated by Sir Oliver Lodge, F.R.S. 422

Notes concerning Tidal Oscillations upon a Rotating Globe. By Lord Rayleigh, O.M., F.R.S. 448

On a New Kind of Glow from Palladium in Vacuum Tubes. By Rev. H. V. Gill, S.J., B.A., Downing College, Cambridge. Communicated by Prof. Sir J. J. Thomson, F.R.S. (Plate 1) 464

The Decay of Surface Waves produced by a Superposed Layer of Viscous Fluid. By W. J. Harrison, B.A., Fellow of Clare College, Cambridge. Communicated by Prof. J. Larmor, Sec. R.S. 477

No. A 557.—July 31, 1909.

The Elastic Limits of Iron and Steel under Cyclical Variations of Stress. By Leonard Bairstow, A.R.C.Sc., Wh. Sch. Communicated by Dr. Glazebrook, F.R.S. (Abstract) 483

The Ionisation produced by an α-Particle.—Part I. By H. Geiger, Ph.D., John Harling Fellow of the University of Manchester. Communicated by Prof. E. Rutherford, F.R.S. 486

PAGE

On a Diffuse Reflection of the α-Particles. By H. Geiger, Ph.D., John Harling Fellow, and E. Marsden, Hatfield Scholar, University of Manchester. Communicated by Prof. E. Rutherford, F.R.S. 495

The Passage of Electricity through Gaseous Mixtures. By E. M. Wellisch, M.A. (Sydney), Emmanuel College, Cambridge. Communicated by Prof. Sir J. J. Thomson, F.R.S. 500

The Effect of Pressure on the Band Spectra of the Fluorides of the Metals of the Alkaline Earths. By R. Rossi, B.Sc. Communicated by Prof. Arthur Schuster, F.R.S. 518

The Coefficients of Capacity and the Mutual Attractions or Repulsions of Two Electrified Spherical Conductors when close together. By Alexander Russell, M.A., D.Sc., M.I.E.E. Communicated by Dr. C. Chree, F.R.S. 524

On the Origin of certain Lines in the Spectrum of ϵ Orionis (Alnitam). By Sir Norman Lockyer, K.C.B., F.R.S., F. E. Baxandall, A.R.C.Sc., and C. P. Butler, A.R.C.Sc., F.R.A.S., F.R.P.S. (Plate 2) 532

On Pressure Perpendicular to the Shear Planes in Finite Pure Shears, and on the Lengthening of Loaded Wires when Twisted. By J. H. Poynting, Sc.D., F.R.S. 546

The Wave Motion of a Revolving Shaft, and a Suggestion as to the Angular Momentum in a Beam of Circularly Polarised Light. By J. H. Poynting, Sc.D., F.R.S. 560

No. A 558.—September 18, 1909.

The Liquidus Curves of the Ternary System :—Aluminium-Copper-Tin. By J. H. Andrew, M.Sc., Dalton Scholar, and C. A. Edwards, Research Fellow and Demonstrator in Metallurgy, Victoria University, Manchester. Communicated by J. E. Stead, F.R.S. (Plate 3) 568

Sensitive Micro-balances and a New Method of Weighing Minute Quantities. By Bertram D. Steele and Kerr Grant. Communicated by Sir William Ramsay, K.C.B., F.R.S. 580

The Effect of a Magnetic Field on the Electrical Conductivity of Flame. By Prof. H. A. Wilson, F.R.S., King's College, London 595

Surface Flow in Calcite. By G. T. Beilby, F.R.S. 599

On the Mechanism of the Absorption Spectra of Solutions. By Robert A. Houstoun, M.A., Ph.D., D.Sc., Lecturer on Physical Optics in the University of Glasgow. Communicated by Prof. A. Gray, F.R.S. 606

On the Absorption of Homogeneous β-Rays by Matter, and on the Variation of the Absorption of the Rays with Velocity. By W. Wilson, M.Sc., Hatfield Scholar of the University of Manchester. Communicated by Prof. E. Rutherford, F.R.S. 612

OBITUARY NOTICES OF FELLOWS DECEASED.
